AMENDMENT

RECEIVED

MAR 1 8 2003

Technology Center 2600

Sir:

For:

In response to the Office Action dated April 8, 2002 please amend the aboveidentified application as follows:

IN THE CLAIMS:

Please amend claims 7, 11, 15, 19, and 23 as follows:

7. (Amended) An electronic device comprising:

a reflection type liquid crystal panel comprising an active matrix substrate and a counter substrate, said active matrix substrate having a plurality of thin film transistors and a plurality of pixel electrodes connected with the thin film transistors;

a light source comprising 3-color light emitting diodes arranged in delta for producing three primary colors for additive color mixing; and

a reflection plate located adjacent to the liquid crystal panel with the light emitting diodes interposed therebetween, said light emitting diodes and the reflection plate arranged horizontally with respect to the liquid crystal panel,

wherein white light emitted from the light source is introduced into said liquid crystal panel from sides of said counter substrate of said liquid crystal panel.
